07- Sliders & Video   (19 pts)

Now that you have a responsive web page, you need to have Flexible media to go inside it.

You may use one of your existing templates for this assignment.

SETUP

Create a folder called "**07media**" on your local hard drive in the root of dgm2740 subdomain. Build your web page inside this folder and upload to the subdomain when you're done.

BASIC SLIDER   4

You will please implement a basic slider with control navigation using 4 graphics appropriately sized.

- ❑ Use at least 4 images
- ❑ Captions on the bottom of each image
- ❑ Links

THUMBNAIL VIEWER   4

You will please implement a basic slider that uses thumbnails as the navigation

- ❑ Use 4 or 8 slides
- ❑ Use a thumbnail for each slide

VIDEO   4

Use iframe code to add a video from an external source. Use the provided code to scale the iframe to fit your responsive design.

- ❑ Vimeo Video.
- ❑ YouTube Video
- ❑ IMDb Video

SPRITES   4

We will create a sprite sheet that has social icons that can be used in your header.

- ❑ Create a sprite sheet with hover states for social icons.
- ❑ Use 4 social icons in your header

LOOK AND FEEL   3

How professional and polished does this look?

- ❑ Perfect CSS=3, Minor flaws = 2, Multiple mistakes = 1
