

What do you hope to get out of this class?

I hope to gain a better grasp on the basics of HTML, CSS, and Java script.

Are you currently working at a job where you are using your HTML skills?

Currently i work at Smash Burger and do not work in a job where i use HTML on a regular basis or at all for that matter.

What is responsive design?

Responsive design is the idea of designing something that responds to any future situation the way that you want it to. Regardless of the browser type or size. Or whether the user is using a computer, tablet or phone. The end result is a pleasant experience that was previously anticipated.
